

AMENDMENT TO THE CLAIMS:

This listing of claims will replace all prior versions of claims in the application:

LISTING OF CLAIMS:

1. (CURRENTLY AMENDED) A method for managing content for output on a wireless device, comprising:
 - (a) displaying content selected for output on a wireless device on a management screen, wherein the content is displayed substantially as it will be displayed on the wireless device;
 - (b) allowing organization of the content;
 - (c) allowing formatting of the content;
 - (d) allowing creation of a link to content; and
 - (e) allowing addition of text for output on the wireless device; and
 - (f) outputting previews of a display screen of the wireless device, the previews depicting how the organized and formatted content will appear on the display screen of the wireless device, the content including both textual and graphical content in some of the previews.
2. (CURRENTLY AMENDED) The method as recited in claim 1, wherein the content is first aggregated in a habitat having views, each of the views having at least one window associated therewith, wherein a user is allowed to define a number of windows associated with a particular view, wherein each view of the habitat represents content to be displayed in a particular view on the wireless device.
3. (ORIGINAL) The method as recited in claim 1, wherein a graphic is imported directly from a data source for output on the wireless device.

CLICP014

- 3 -

4. (ORIGINAL) The method as recited in claim 1, wherein a link is dragged and dropped into the management screen.
5. (ORIGINAL) The method as recited in claim 1, wherein a maximum character length of text content displayed upon selection of a link on the wireless device is configurable.
6. (ORIGINAL) The method as recited in claim 1, wherein a number of lines of text content displayed upon selection of a link on the wireless device is configurable.
7. (ORIGINAL) The method as recited in claim 1, wherein the content is a table.
8. (CURRENTLY AMENDED) The method as recited in claim 1, wherein a ~~preview of the content as the content is displayed on the wireless device is~~ output at least one of a maximum character length and a number of lines of text content displayed upon selection of a link on the wireless device is configurable, wherein a full text of the text content is output on the wireless device upon receiving a request from the user.
9. (ORIGINAL) The method as recited in claim 1, wherein the wireless device is at least one of a personal digital assistant (PDA), a handheld computer, a wireless telephone, a device connected to a wireless modem, a pager, and a standard telephone that transmits text-to-speech audio output.
10. (CURRENTLY AMENDED) A computer program product for managing content for output on a wireless device, comprising:

CLICP014

- 4 -

- (a) computer code for displaying content selected for output on a wireless device on a management screen, wherein the content is displayed substantially as it will be displayed on the wireless device;
 - (b) computer code for allowing organization of the content;
 - (c) computer code for allowing formatting of the content;
 - (d) computer code for allowing creation of a link to content; ~~and~~
 - (e) computer code for allowing addition of text for output on the wireless device; and
 - (f) computer code for outputting previews of a display screen of the wireless device, the previews depicting how the organized and formatted content will appear on the display screen of the wireless device, the content including both textual and graphical content in some of the previews.
11. (ORIGINAL) The computer program product as recited in claim 10, wherein the content is first aggregated in a habitat.
12. (ORIGINAL) The computer program product as recited in claim 10, wherein a graphic is imported directly from a data source for output on the wireless device.
13. (ORIGINAL) The computer program product as recited in claim 10, wherein a link is dragged and dropped into the management screen.
14. (ORIGINAL) The computer program product as recited in claim 10, wherein a maximum character length of text content displayed upon selection of a link on the wireless device is configurable.
15. (ORIGINAL) The computer program product as recited in claim 10, wherein a number of lines of text content displayed upon selection of a link on the wireless device is configurable.

CLICP014

- 5 -

16. (ORIGINAL) The computer program product as recited in claim 10, wherein the content is a table.
17. (CURRENTLY AMENDED) The computer program product as recited in claim 10, wherein ~~a preview of the content as the content is displayed on the wireless device is output~~ at least one of a maximum character length and a number of lines of text content displayed upon selection of a link on the wireless device is configurable, wherein a full text of the text content is output on the wireless device upon receiving a request from the user.
18. (ORIGINAL) The computer program product as recited in claim 10, wherein the wireless device is at least one of a personal digital assistant (PDA), a handheld computer, a wireless telephone, a device connected to a wireless modem, a pager, and a standard telephone that transmits text-to-speech audio output.
19. (CURRENTLY AMENDED) A system for managing content for output on a wireless device, comprising:
- (a) logic for displaying content selected for output on a wireless device on a management screen, wherein the content is displayed substantially as it will be displayed on the wireless device;
 - (b) logic for allowing organization of the content;
 - (c) logic for allowing formatting of the content;
 - (d) logic for allowing creation of a link to content; and
 - (e) logic for allowing addition of text for output on the wireless device; and
 - (f) logic for outputting previews of a display screen of the wireless device, the previews depicting how the organized and formatted content will appear on the display screen of the wireless device, the content including both textual and graphical content in some of the previews.

CLICP014

- 6 -

20. (ORIGINAL) The system as recited in claim 19, wherein the content is first aggregated in a habitat.
21. (ORIGINAL) The system as recited in claim 19, wherein a graphic is imported directly from a data source for output on the wireless device.
22. (ORIGINAL) The system as recited in claim 19, wherein a link is dragged and dropped into the management screen.
23. (ORIGINAL) The system as recited in claim 19, wherein a maximum character length of text content displayed upon selection of a link on the wireless device is configurable.
24. (ORIGINAL) The system as recited in claim 19, wherein a number of lines of text content displayed upon selection of a link on the wireless device is configurable.
25. (ORIGINAL) The system as recited in claim 19, wherein the content is a table.
26. (CURRENTLY AMENDED) The system as recited in claim 19, wherein a ~~preview of the content as the content is displayed on the wireless device is~~ output at least one of a maximum character length and a number of lines of text content displayed upon selection of a link on the wireless device is configurable, wherein a full text of the text content is output on the wireless device upon receiving a request from the user.
27. (ORIGINAL) The system as recited in claim 19, wherein the wireless device is at least one of a personal digital assistant (PDA), a handheld computer, a

CLICP014

wireless telephone, a device connected to a wireless modem, a pager, and a standard telephone that transmits text-to-speech audio output.

28. (CURRENTLY AMENDED) A method for managing content for output on a wireless device, comprising:
- (a) aggregating content selected for output on a wireless device in a habitat having views, each of the views having at least one window associated therewith, wherein a user is allowed to define a number of windows associated with a particular view, wherein each view of the habitat represents content to be displayed in a particular view on the wireless device;
 - (b) displaying the content on a management screen;
 - (c) allowing organization of the content;
 - (d) allowing formatting of the content;
 - (e) allowing creation of links to content;
 - (f) converting the content into a format amenable to display on a wireless device;
and
 - (g) transmitting the converted content to a wireless device;
 - (h) formatting text content for audible output on the wireless device;
 - (i) outputting previews of a display screen of the wireless device, the previews depicting how the organized and formatted content will appear on the display screen of the wireless device, the content including both textual and graphical content in some of the previews.
29. (ORIGINAL) The method as recited in claim 28, wherein a link is dragged and dropped in the management screen.
30. (ORIGINAL) The method as recited in claim 28, wherein a maximum character length of text content displayed upon selection of a link on a wireless device is configurable.

31. (ORIGINAL) The method as recited in claim 28, wherein a number of lines of text content displayed upon selection of a link on the wireless device is configurable.
32. (ORIGINAL) The method as recited in claim 28, wherein the content is a table.
33. (CURRENTLY AMENDED) The method as recited in claim 28, wherein a ~~preview of the content as the content is displayed on the wireless device is output~~ at least one of a maximum character length and a number of lines of text content displayed upon selection of a link on the wireless device is configurable, wherein a full text of the text content is output on the wireless device upon receiving a request from the user.
34. (ORIGINAL) The method as recited in claim 28, wherein the wireless device is at least one of a personal digital assistant (PDA), a handheld computer, a wireless telephone, a device connected to a wireless modem, a pager, and a standard telephone that transmits text-to-speech audio output.
35. (ORIGINAL) The method as recited in claim 28, wherein the wireless device is at least one of a personal digital assistant (PDA), a handheld computer, a wireless telephone, a device connected to a wireless modem, and a pager.
36. (ORIGINAL) A method for structuring navigation data in a wireless publisher, comprising:
- (a) aggregating content selected for output on a wireless device in a habitat having views, each of the views having windows associated therewith;
 - (b) depicting an identifier of each of the views in a navigation tree;

CLICP014

- 9 -

- (c) showing identifiers of the windows under the identifier of the associated view in the navigation tree;
 - (d) displaying links of the windows under the identifiers of the associated windows; and
 - (e) allowing linking from one window in one view to another window in another view using the navigation tree.
37. (CURRENTLY AMENDED) The method as recited in claim 36, wherein a link is created in a window upon dragging a link onto the identifier of the window in the navigation tree. [.]
38. (CURRENTLY AMENDED) A method for presenting a preview of content on a display of a wireless device, comprising:
- (a) aggregating content selected for output on a wireless device in a habitat;
 - (b) displaying the content on a management screen amenable to allowing formatting of the content; and
 - (c) ~~presenting a preview of the content as displayed on the wireless device~~ outputting previews of a display screen of the wireless device, the previews depicting how the content will appear on the display screen of the wireless device, the content including both textual and graphical content in some of the previews.
39. (ORIGINAL) The method as recited in claim 38, wherein the preview further includes a depiction of a chassis of the wireless device.
40. (CURRENTLY AMENDED) A method for managing content for output on a wireless device, comprising:
- (a) aggregating content selected for output on a wireless device in a habitat;

- (b) displaying content selected for output on a wireless device on a management screen, wherein the content is displayed substantially as it will be displayed on the wireless device, wherein the wireless device is at least one of a personal digital assistant (PDA), a handheld computer, a wireless telephone, a device connected to a wireless modem, a pager, and a standard telephone that transmits text-to-speech audio output;
 - (c) allowing organization of the content;
 - (d) allowing formatting of the content;
 - (e) allowing creation of a link to content;
 - (f) allowing addition of text for output on the wireless device;
 - (g) converting the content into a format amenable to display on a wireless device; and
 - (h) transmitting the converted content to a wireless device; and
 - (i) outputting previews of a display screen of the wireless device, the previews depicting how the organized and formatted content will appear on the display screen of the wireless device, the content including both textual and graphical content in some of the previews.
41. (ORIGINAL) The method as recited in claim 40, further comprising formatting text content for audible output on the wireless device.
42. (ORIGINAL) The method as recited in claim 40, further comprising formatting text content for audible output on a wired device.
43. (ORIGINAL) The method as recited in claim 1, further comprising formatting text content for audible output on the wireless device.
44. (ORIGINAL) The method as recited in claim 1, further comprising formatting text content for audible output on a wired device.
